Expert in anti-aging ingredients

Backed by three decades of research and development of nutritional supplements, Certified Nutraceuticals pioneered the original invention of three Collagen Type II patents (US Patent #8,344,106 B1) for dietary supplements and the first to introduce Collagen Types I, II, and III food supplements to the health food market more than 25 years ago.

Certified Nutraceuticals is the ideal partner for companies that want success in the fast-growing anti-aging nutritional supplements sector.

Certified Nutraceutical's expertise in nutritional anti-aging food supplements are based on long-term experience in dietary supplements processing and production, using state-of-the-art spray-dry, mixing and filling plants. The Certified Nutraceuticals team comprises nutritionists, chemists, scientists, product development experts, experienced purchasers and many partners from science, law, market analysis, packaging design, logistics and other fields.

Broad services

Certified Nutraceuticals provides all services from the first brainstorming to manufacturing, filling and product launch, including logistics and disposition. Clients can opt for full service but also contract selected services. If requested, Certified Nutraceuticals supports its clients with trends and market analysis, strategic advice and regulatory advice for the respective target markets. All raw materials and products are analyzed and produced in accordance with fair trade criteria, eco and dietary regulations, Federal Drug Administration (FDA) and Cosmetics Act (FD&C Act), the Fair Packaging and Labelling Act (FPLA) and other related laws, as well as kosher and halal requirements.

Food safety is addressed by HACCP management; production facilities are GMP-ISO-SQF 2000 certified. After final quality control the products may be distributed by Certified Nutraceuticals logistics service partners, offering North America, Europe, Australia, New Zealand, Asia, Middle East and Africa distribution from bulk powder such as 25kg sealed drums, bulk finished products and parcels in accordance with specific supply chain requirements.

Advantages

Certified Nutraceuticals can be contracted as a one-stop shop for the full service from development of ideas to product launch. As

a unit of Certified Nutraceuticals, it can tap into 30 years of nutritional processing experience and a huge network of partners for all aspects of product development as well as marketing and distribution leaving clients free to focus on sales. As suppliers of raw ingredients, finished products and private label, Certified Nutraceuticals creates high-quality patented nutritional ingredients that can be marketed exclusively under the customer's name
