Date Founded

CMC began offering Toll Processing services in 1998, and we expanded into manufacturing a full line of milling and mixing equipment by 2004. In 2016 a new state of the art, class 100,000 (ISO 8) cGMP room was added.

Company Description

Custom Milling & Consulting, Inc. is unique in comparison to many companies because we provide our customers with a full range of processing solutions. We understand your production needs and the limitations you may encounter in your own facility. Our experts have years of experience and specialize in understanding particle size reduction in liquid form. CMC provides solutions from full turnkey toll processing services, to a full line of manufacturing equipment.
