## Company Description

Dr. Paul Lohmann GmbH KG is the world's leading manufacturer of specialty mineral salts to the food, dietary supplement, cosmetic, and pharmaceutical industries. With more than 130 years of manufacturing experience, our innovation and flexibility enables us to respond rapidly to the changing needs of our customers.

We offer the broadest available portfolio of products and services: More than 400 different mineral salts in a variety of qualities, expertise in manufacturing and customized product development – all designed to provide optimum performance across a wide range of applications. At our ISO- and GMP-certified production sites, we use state-of-the-art equipment to ensure products of the highest quality.

## Key North American Personnel

Thierry Roulet, Head of Dr. Paul Lohmann N. America

Ralf Dieckhoff, VP Sales and Service, N. America

Joe Weinzapfel, VP Sales Central & West, N. America

## Our Products and Concepts

Aside from offering standard products at all quality levels and according to the various pharmacopoeias and food regulatory guidelines, we also develop customized products to our customers' precise requirements. Customization includes – but is not limited to - the adaption of numerous chemical and physical parameters, such as, density, particle size, purity, etc.

Our experienced R&D department works in close cooperation with our customers to meet their specific requirements.

## 2017 "New Product" Highlights

New products for use in development of nutritional supplements in 2017 include:

- Full line of Bis-Glycinates (Fe, Ca, Mg, Cu, and Zn)
- Soluble Tri-Magnesium Di-Citrate
- Calcium Citrate Malate
- Ca, Mg, & Zn Pidolates (highly soluble mineral salts)
- Ultra-fine and Super-fine grades of Ferric Pyrophosphate

## Granulation & DC Grades

Granulates are free flowing, dust free particles that allow for shorter disintegration times. Dr. Paul Lohmann offers granulated and/or direct compression qualities of:

- Calcium Carbonate
- Tri-Calcium Citrate
- Ferrous Fumarate
- Magnesium Carbonate
- Magnesium Lactate 2-Hydrate
- Tri-Magnesium Di-citrate

With these DC Qualities, our customers are able to save production costs in tablet manufacturing.

## Microencapsulation

Microencapsulated mineral salts – particularly Iron, Copper and Zinc – are designed to avoid taste impairments, as well as, reducing adverse chemical interactions such as lipid oxidation with other ingredients. Dr. Paul Lohmann's unique technology ensures that each particle of a product is covered with a homogenous protective vegetable oil coating. We are able to provide different coating qualities, depending on the intended application.

## GMO products

Based on the raw material sources for the production of our citrates, lactates, gluconates, etc, Dr. Paul Lohmann can actually claim a full GMO-free range of minerals. The Northern American market can expect DPL US to serve its customers with consistent Feel free to correct my poor English if necessary.

## A full range of Bisglycinates

Dr Paul Lohmann offers now a full range of chemically pure Bisglycinates: Ca, Mg, Mn, Cu, Fe & Zn. This range is made by pure chemical synthesis and offers the customers GMO-Free Bysglycinates with a controlled and consistent metal content for the safety of the consumers.
