Company Description

EPS/CCA is a leading supplier of coating resins and colorants to serve the Architectural, Industrial, Construction, Adhesives and Sealants markets. With more than 20 years in the industry, EPS/CCA continues to deliver products backed by unmatched technical and customer support. Headquartered in Marengo, IL, USA, EPS/CCA maintains operations in the US, Europe and China providing quality products with exceptional R&D resources.

Technical Mission

With decades of experience, we are committed to understanding the needs of our customers and helping them succeed with innovative technology and superior service. With a personalized approach, innovative technology and exceptional technical service we make doing business easy.

Markets Served

EPS/CCA offers a comprehensive selection of innovative emulsion technologies, conventional resins and colorants to serve the Architectural, Industrial, Construction, Adhesives, and Wood markets.

Technologies

EPS' acrylic and styrene acrylic emulsions utilize proprietary adhesion technology with value-added features, including superior adhesion to multiple substrates, early water resistance, block resistance and abrasion resistance.

The exterior exposure test fence program ensures that durability properties such as grain-crack resistance, chalk adhesion and dirt pickup resistance are achieved.

Additional resin choices include alkyds, water dispersible alkyds, PUDs, polyesters and solution acrylics.

Major Products

EPS acrylic and styrene acrylic emulsions offer superior performance properties at very low VOC and are designed for direct application to challenging substrates such as concrete, chalky surfaces, glossy surfaces, and ferrous and non-ferrous metals. CCA Colorants product lines NovoColor® IP, NovoColor® SF, ExacTint®, Universal Colorants, OptiColor® IP, OptiColor® PE, and OptiColor® XP provide a full colorant offering for water based and solvent based applications.
