## Over 90 years of experience

### Company Description

LANXESS Inorganic Pigments is the world's largest producer of iron oxide pigments and has production sites on five continents that meet the highest technical and ecological standards. All BAYFERROX® and COLORTHERM® pigments offer outstanding quality in all chemical and physical properties, being unique in their product attributes and distinctively different from other products in the market

### Markets Served

LANXESS understands that color pigments for coatings must fulfill the highest performance requirements and produces them as such. The variety of applications include emulsion and decorative paints, industrial and powder coatings, coil coatings, automotive coatings, corrosion protection, and wood or furniture coatings.

### Geographic Locations Served

LANXESS pigments business has its origins in Germany. With approximately 1500 employees worldwide, the LANXESS Inorganic Pigments business unit is always close to you. Wherever you are, our door is always open.

### Technical Services

LANXESS Inorganic Pigments is a technology leader with a global network of Competence Centers, providing customers in all regions of the world with proficient and active support.

### Major Products

LANXESS products BAYFERROX® and COLORTHERM® can be used in a wide variety of applications. These include not only the coloring of various materials but also technical applications which color plays only a minor role.

### Global Capabilities

LANXESS Inorganic Pigments has a global network of production sites in Germany, Brazil and China, plus additional mixing and milling facilities in Australia, UK, Spain and the United States.
