Website: [www.munzing.com](http://www.munzing.com)

## Company Description

Munzing, a family owned business with headquarters in Abstatt, Germany, is a global specialty additive supplier with highly experienced R&D and technical service personnel in Europe, the Americas and Asia. Our manufacturing plants in Europe and America have broad synthesis and formulation capabilities to best serve our global customer base.

## Markets Served

Munzing's defoamers are industry standards for reducing the problems associated with foam formation in the production and application of water-based systems, including: Architectural Coatings, Adhesives, Industrial Coatings, Printing Industry, Wood Coatings and Grinding Pigments.

## Technologies

Munzing has state-of-the-art R&D labs in the United States and Europe. Seasoned scientists in these labs continually develop new additives that create value for the paint and coatings industry. Furthermore, Munzing has unique and proprietary technology available solely through its organization.

## Technical Services

Munzing offers technical service testing to focus on solving customer issues by duplicating the customer process and not by the generalization of formulation characteristics. We employ a wide range of test methods to reproduce the conditions that a coating experiences during manufacturing, packaging and application.

## Major Products

- CERETAN and LUBA-print- micronized and coated waxes and wax dispersions
- DEE FO® and AGITAN® – defoamers for printing inks, coatings and adhesives
- EDAPLAN® – leveling and universal dispersing agents
- METOLAT® – wetting agents and dispersants for specific pigment groups
- TAFIGEL® – rheology modifiers for printing ink and coatings formulations
