## Company Description

Siltech is a privately owned business, we hope and believe that the pride we feel in this company channels its way through each of our employees to every customer. We develop, manufacture and market a full line of organo-functional silicone compounds and related specialties for a wide range of industrial applications, using our patented and otherwise proprietary technologies.

## Products' Scope

Siltech offers the ink industry a broad line of silicone additives and Silmer® reactive silicones as well as more unique chemistries. Our additives provide special properties including slip, gloss, mar resistance, flow, leveling, and foam control. These are efficient at very low concentrations, cost effective, and widely used. Our expertise and portfolio of reactive silicones aligns with industry needs to bind into an ink as well as to modify resins obtaining hybrid properties including 3D printing matrices.

## Major Products

- Silmer ACR acrylated silicone series for slip, softness, flexibility, stain and mar resistance in UV cured inks and coatings and 3D printing matrices.
- Siltech Additives for softness, flow, leveling, slip, mar, and foam control.

## Unique Products

Our newest products are Silmer® OHT products for fluoro-free anti-graffiti and stain release. This series of products bloom to the surface and orient to maximize the low surface energy of the silicone polymer providing stain release that rivals fluoroalkyl products without and fluoro content.

## R&D Capabilities

Our R&D, Technical Service and Process R&D laboratories are modern, well-equipped, co-located with our manufacturing facilities and staffed with first-class chemists and engineers. These scientists have years of experience in synthesis and key applications.

## QC Capabilities

Our first rate analytical labs and personnel support the quality of our manufactured products as well as new product development and technical service.

## ISO & Environmental Standards

ISO 9001:2008 Registered, Siltech advocates and follows the three pillars of sustainability: environmental, social and economic. Sustainability pervades our decisions both strategically and tactically. We believe that every person and every company needs to consider their impact on our planet.

## Additional Facilities and Contacts

Additional manufacturing: Mississauga, ON Canada  
Sales Contact: Bob Ruckle, [Robert@siltech.com](mailto:Robert@siltech.com)  
European Contact: Dave Wilson; [Dave.wilson@siltech.com](mailto:Dave.wilson@siltech.com)

Asian Contact: Lizal; [Lizal@siltech.com](mailto:Lizal@siltech.com)  
Technical Contact: Rick Vrckovnik; [Rick@siltech.com](mailto:Rick@siltech.com)

## Conclusion

Siltech is a medium sized, family owned, innovation-based, specialty silicone supplier with excellent customer service, technical and manufacturing capabilities.

We offer a broad line of additives and reactive silicones for printing inks and 3D printing matrices. We typically partner with customers to create new and useful products.
