Company Description

Solvay is a worldwide leader of high performance monomers, polymers, surfactants, dispersants and additives to the coatings industry. Solvay delivers creative solutions to meet customers' needs for sustainable, high-performance solutions. With continuous investments in a global manufacturing footprint and dedicated R&D support, Solvay continues to be an added-value partner.

With the acquisition of Cytec in 2015, Solvay further expanded an already comprehensive portfolio of products dedicated to the Coatings industry.

Solvay Novecare has been a global leader in emulsion polymerization enabling the conversion to water-based systems with specialty surfactants and monomers. Understanding surface chemistry and having the right building blocks to offer effective, tailored, additives solutions can further boost performance for a variety of coatings.

Solvay Specialty Polymers holds leading positions with high performance PVDC and PVDF polymers, PTFE, and PFPE additive technologies.

Solvay's product portfolio are part of three main solutions

- **Color Solutions:** The Rhodoline range includes dispersants and wetting agents.
- **Binder Solutions:** Products include Rhodafac, Rhodasurf, Abex and Aerosol surfactants, as well as specialty Sipomer monomers; along with Dioan and Ixan PVDC, Hylar PVDF, Polymist PTFE and Fluorolink PFPE technologies.
- **Performance Solutions:** This broad range of APE-free and zero VOC paint additives includes freeze/thaw and open-time extender additives.
