MULTIPLE MANUFACTURING SITES

With manufacturing sites on both the west and east coast, Specialty Polymers is ideally suited to meet each customer's needs.

Our company's Oregon facility has 60,000 square feet of production space on five acres. In South Carolina, our production facility sits on more than 25 acres with 83,000 square feet of production space.

Technology Driven

Our strength is the development of innovative polymers. For more than 45 years, we have been on the forefront of polymer development. Our highly skilled polymer and application chemists work in research and development facilities located in Oregon and South Carolina.

ENVIRONMENTALLY FRIENDLY PRODUCTS

Specialty Polymers continues to deliver innovative technology that enables our customers to successfully meet the strictest environmental standards while maximizing performance. Low and ultra-low VOC coatings are replacing traditional coatings in many applications, and Specialty Polymers has developed high performance resins designed for the latest trends in formulation. Our highly skilled polymer and application chemists work closely with our customers to provide environmentally friendly solutions to the challenges presented in the green coatings and adhesives market today.

ABOUT SPECIALTY POLYMERS

Specialty Polymers is a dynamic, privately held manufacturer of water-based polymers and adhesives. Our products are designed to meet the most demanding needs from customers around the world, and our employees are committed to providing the best customer service in the industry. We pride ourselves on being an innovative, responsive and flexible supplier of high quality products.

HISTORY

Our roots date back to 1969, when Ray Southwell started Specialty Polymers with a goal to provide high quality, innovative products to the coatings industry. Since then, Specialty Polymers has grown to have multiple manufacturing sites and more than 300 active products.

DIVERSE PRODUCT LINE

We are a key supplier of water-based emulsion polymers for a wide variety of applications. Our strength has been the flexibility to develop custom solutions and provide the right polymer for your exact needs.

- Architectural paints
- Industrial coatings
- Wood coatings
- Performance Modifiers
- Paper coatings
- Textile coatings
- Roof coatings
- Graphic arts & inks
- Concrete sealers & ad-mixes
- Adhesives
- Custom designed emulsions
