Company Description

Troy Corporation is a global leader in performance materials - principally preservatives and additives - used in the manufacture of paint and coatings, building products, adhesives and sealants, textiles, metalworking fluids, cosmetics, and personal care products. Troy has served these industries with innovative, value-added products for over sixty years. The company's success in introducing new materials in anticipation of industry needs has fueled expansion into new markets worldwide.

Troy invests significant resources in research and development to address emerging needs and is dedicated to providing customers with continually improved products. Troy is positioned to offer service to customers through a global network of technical support, complemented by local sales staff.

Troy has expanded its preservative offerings through the acquisition of the Fungitrol®, Nuosept®, Bacillat®, Bakzid®, Bodoxin®, Cinon®, Cleanguard®, Ebotec®, and Plastiguard® brands. With the addition of these product lines, Troy's premier portfolio of preservatives has been enhanced, delivering even more value, performance, sustainability, and formulating flexibility to manufacturers worldwide.

Markets Served

Troy operates modern manufacturing facilities in North America, Europe, and Asia. Troy is recognized for providing a wide range of high quality preservatives, additives, and specialty performance products to customers in over 100 countries.

Troy manufacturing facilities are ISO 9001:2008 Certified, indicating commitment to high quality. Troy also achieved ISO 14001:2004 certification of its Newark, New Jersey, USA manufacturing facility, recognition of the company's environmentally sound manufacturing process. As a global manufacturer, Troy has reached important milestones in extending its presence to markets around the world with product recognition for quality, reliability, and value.

Technologies

Troy products improve coating properties, protect against product spoilage in package, and resisting fungal and algal attack on the applied coating surface. In the USA, Troy is the leading producer of zero VOC (volatile organic compound) dry-film preservatives offering protection against marring and premature failure due to microbial attack. Additionally, Troy recently launched a new line of highly efficient defoamers for aqueous systems and provided a series of high performance substrate wetting agents capable of coating many difficult hydrophobic surfaces. Troy remains committed to the ongoing pursuit of product innovation and the advance of technology in the markets the company serves.

Troy's experienced Technical Service staff provides customers with expert assistance to meet a diversity of challenges. Troy utilizes the latest advances in performance materials research to create unique solutions for customers from Technical Service Centers in North America, Europe, and Asia.

Major Products

- Polyphase® Dry-Film Preservatives
- Troysan® Dry-Film Preservatives
- Fungitrol® Dry-Film Preservatives
- Mergal® Wet-State Preservatives
- Nuosept® Wet-State Preservatives
- Troykyd® Defoamers
- Troythix® Rheology Modifiers
- Troysol™ Pigment/Substrate Wetting
- Troysperse™ Flow & Leveling Additives
- Troymax™ Dispersants
- Powdermate® Driers, Metal Carboxylates, & Anti-Skinning Agents
- TroyCare™ Powder Coating Additives
- TroyGuard™ Preservatives for Personal Care
- OilMate™ Preservatives for HI&I
- Additives for the Energy Industry
