Company Description

Working with the highest quality manufacturers of proprietary and natural ingredients, Xsto helps develop, market and launch new and novel ingredients into North America. Acting as an extension of a manufacturer's "sales and marketing" team, Xsto is capable of bringing new ingredients to our extensive list of clients, helping to establish a new ingredient and build sales without the expense and commitment of a full staff. Our unique line of ingredients is offered for use in food, beverage and dietary supplement formulations.

For finished product manufacturers Xsto offers safe, efficacious and scientifically supported ingredients. Using our network of contacts and relationships, Xsto can "fast track" ingredients to the industry decision makers for functional beverages, food and dietary supplements. Unlike distributors, Xsto handles a very limited number of ingredients with a focus on detailed scientific product presentations.

北米でのマーケティングは当社にお任せ下さい。
