## Company Description

Shamrock creates innovative products our customers need to grow their businesses. For over 80 years, Shamrock advances have driven the use of PTFE and wax additives in a wide range of applications including inks, coatings, lubricants, thermoplastics, and personal care products. Shamrock is the global leader in PTFE additives, pioneering their use for inks and coatings and offering an extensive product line including PTFE powders, specialty waxes, compounds, emulsions, and dispersions. These materials enhance our customers' products by controlling slip, rub/abrasion resistance, texturing, water repellency, gloss/matting and feel.

## Technical Mission

Our in-depth technical knowledge and production experience gives ink and coatings formulators the edge they need. Shamrock serves our customers' needs with extensive application and R&D laboratories, custom production equipment, and industry experienced professionals. Our chemists, scientists, and engineers are highly trained experts in the major applications and industries and bring valuable first-hand knowledge to customers through our Technical Service Group (TSG). All of our facilities are ISO 9001:2015 Certified.

## Commitment to Service

We strive to make buying and using Shamrock products as easy and efficient as possible. Shamrock's international Sales Network ensures that each of our customers receives optimal attention, support, and service, while our Customer Service Group offers assistance with scheduling, normal and special deliveries, warehousing, and many other details, before, during, and after the sale.

## Product Lines

- BioSLIP: Natural bio-based wax micropowders with excellent slip and superior mar resistance, with a controlled impact on gloss and clarity.
- RC Series: EU Regulatory Compliant (RC) PTFE containing products available in powder, dispersion and compound form
- Hydrocer Products: pre-dispersed or emulsified additives for water based systems
- SST® Products: full range of micronized PTFE powders
- AquaFLON® Products: micronized water based PTFE dispersions
- S-Products: wide variety of micronized waxes and alloys
- Texture Products: texturing agents for all liquid coatings
- PowderTEX Products: texturing agents for powder coatings
- FluoroSLIP® Products: micronized PTFE/wax blends for optimal slip and abrasion resistance
- Neptune Products: micronized PTFE and waxes for water based systems

## Global Capabilities

### U.S. Production Facilities:

Foot of Pacific Street  
Newark, NJ 07114-2888

557 South Woods Drive  
Fountain Inn, SC 29644
